

Version definitions

WinRFCalc/WinPIMCalc software release version versions are coded as Major Version (MM) and Maintenance Version (mm) VMMmm.

For example: WinRFCalc V2423 is:
Major Version 24 Maintenance version 23

A Minor version is a Free of Charge intermediate update of the software that can be downloaded via the rfcalculator.com download page. When a Minor software update is available, it will be mentioned on rfcalculator.com.

To secure the correct operation of the software, the download and installation of the Minor revision is mandatory and must therefore be installed onto your device. The current version is made obsolete and the software can not start until you have performed the installation.

A Major version is defined as the release of a new WinRFCalc package with new *tools, layouts and functions added to the program*.

After the release of a Major version, a new maintenance period of this Major version starts. During the maintenance period software bugs are fixed and minor changes and/or improvements are implemented free of charge to the main version with an increment of the versions **mm** number.

WinRFCalc/WinPIMCalc pricing is based on the installation of a MAIN version and options of the software on a device.

The version can be in initial version (e.g. V2400) , or any later released intermediate maintenance version. The license allows to user to install and use any version of WinRFCalc from VMM00 to VMM99, where MM is the Major release number and 00 to 99 the maintenance versions.

In case the user installs a new MAJOR version of the software on a device, the license must be renewed and paid for the use of the new and higher MAJOR software version before the software can run on the users device.

System requirements:

The software can run on a Windows 10 / 11 machine with .NET 4.8 installed.
A screen size of 1920 x 1080 is preferred.

Virus Warranty

rfcalculator.com further represents and warrants that it will take reasonable commercial efforts to ensure that the Software, in the form and when provided to you, will be free of any viruses, malware, or other harmful code. For any breach of the foregoing warranty, your sole and exclusive remedy, and rfcalculator.com 's sole obligation, is to provide a replacement copy of the Software promptly upon notice.

Warranty Disclaimer.
